THAIEPAY

Guidebook for getting started

an online payment gateway system which is
trusted by many stores.

(English Version)

[Get started with ePayment]

How to get started with ePayment

After your store has been completely approved by THAIEPAY, you can access control panel system to manage your account with THAIEPAY. The system allows you to view all orders from buyers, update news, income, daily exchange rates, cancel or refund payments, and more.

1. Check and rectify your information at menu "MERCHANT"

Firstly, you must check the correctness of your personal details, including bank account which is used in receiving income from THAIEPAY. If you found any mistakes or wrong details, you can edit from the sub menus, "Edit Merchant Details" or "Edit Bank Account Details". After edited, THAIEPAY staff will process the change from you afterward.

The screenshot shows the 'Merchant Details' page in the THAIEPAY merchant control panel. The page includes a navigation menu with options like 'HOME', 'MERCHANT', 'SYSTEM', 'Orders & Buyers', and 'Renew Account'. Under 'MERCHANT', there are sub-menus for 'Merchant Details', 'Bank Account Details', 'Service Type', 'Edit Merchant Details', 'Edit Bank Account Details', and 'Change Password'. The main content area displays the following details:

- MerchantID: 00000500
- Name: Surad
- Surname: Bundkralsana
- Company or Website Name: PORAR WEB APPLICATION (Testing Account Epaylink)
- Address: 731 PM Tower, Dindang road.
- Alternate Address:
- Sub District/City:
- District/State: Dindang

On the right side, there is an 'Exchange Rate' table for Monday, December 08, 2008:

Country	Currency	Buying T/T
USA	USD	34.50
DEU	EUR	51.29
GBR	GBP	44.89
CHE	CHF	28.62
JPN	JPY	0.38
SIN	SGD	23.13
KOR	KRW	4.51
AUS	AUD	22.64

Below the exchange rate table is an 'FAQ' section with one question: '1. How does the THAIEPAY system pay income back to...'

2. Connect THAIEPAY system at menu "SYSTEM"

After checked information, you can start connecting THAIEPAY system with your website instantly. You must begin with the sub menus, "System Connection" and "Return Parameter". You need to learn more details about ePayment system and how to connect from "System Connection Guidebook". (About sub menus, **Logo & Interface**, **Custom Theme**, or **Advance Theme**, you can edit later)

The screenshot shows the 'System Connection' page in the THAIEPAY merchant control panel. The page includes a navigation menu with options like 'HOME', 'MERCHANT', 'SYSTEM', 'Orders & Buyers', and 'Renew Account'. Under 'SYSTEM', there are sub-menus for 'Primary Setting', 'Logo & Interface', 'Custom Theme', 'Advance Theme', 'System Connection', 'Return Parameter', and 'THAIEPAY Logo'. The main content area displays the following information:

All of details, parameter values, and url regarding how to connect THAIEPAY systems with your website are provided as follows.

Parameter Values

To connect THAIEPAY system with your website can be integrated easily by sending parameter values in POST style. You can send parameter values in HTML, scripts ASP, PHP, ASP.NET, or another programming language to THAIEPAY or the URL:

<https://www.thaiepay.com/epaylink/payment.aspx>

Required parameters values are as follows. (This is only a small part of how to connect with THAIEPAY system. For more details, you can download here: [System Connection Guidebook](#))

Parameter Name	Type	Length	Detail
merchantid	int	8	8 digits of merchant identity (Your MerchantID is 00000500)
refno	int	10	Reference number of each order (The number should not be repeated)
customeremail	string	100	E-mail address of the buyer or cardholder

On the right side, there is an 'Exchange Rate' table for Monday, December 08, 2008:

Country	Currency	Buying T/T
USA	USD	34.50
DEU	EUR	51.29
GBR	GBP	44.89
CHE	CHF	28.62
JPN	JPY	0.38
SIN	SGD	23.13
KOR	KRW	4.51
AUS	AUD	22.64

Below the exchange rate table is an 'FAQ' section with one question: '1. How does the THAIEPAY system pay income back to its merchant?'

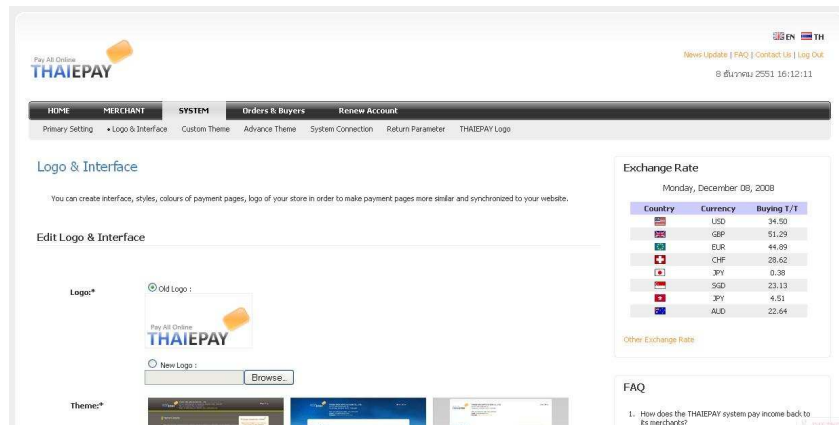

3. Test the connection of payment process between THAIEPAY and your Website

After connected, you can test the payment process. When it comes to payment page, you can fill the details of **Dummy Card** in the required boxes. (Test Card is provided in "System Connection Guidebook".) If the systems are connected correctly, it will appear **"Thank You!! Your payment has been completed"**.

4. Other settings

The main purpose of using THAIEPAY is to offer payment gateway to buyers and allow them to pay online by credit cards. Therefore, after systems are connected successfully, you can manage other settings for your account such as **"Logo & Interface, SMS Alert for Payment Received, and SMS Alert for Renewal"**.

5. Learn more about Main Menus and Sub Menus

THAIEPAY also provided many menus to support all your needs and convenience. You can learn more and get familiar with main menus and sub menu yourself. There will be short descriptions of each main menu and sub menu for you to read first. If there are any unclear details or you did some mistakes in the system, you can contact THAIEPAY directly for instructions, and suggests.
